

Nikhil Kalhan

Date of birth: 22/01/1992 **Nationality:** British
Address: 15 Church road, London TW7 4PR, United Kingdom **Phone number:** +447817309155
Email address: nkalhan@hotmail.co.uk **Web:** <https://nikhil-website-portfolio.vercel.app/>

Profile

Objective: Detail-oriented and highly skilled Developer with a strong focus on backend Python development at Bank of America for the past two years, alongside extensive experience in Front End and Full Stack development. Proven track record of designing and implementing efficient, user-friendly web applications. Utilizing a solid understanding of Python backend technologies, HTML, CSS, JavaScript, and responsive design principles, I strive to deliver visually appealing and seamless user experiences. Committed to continuously learning and adapting to evolving technologies while collaborating effectively within cross-functional teams to deliver outstanding results.

Work Experience

07/2024 – present
London, United Kingdom

Python Developer Bank of America

- Develop and maintain Python-based automation solutions within the **Quartz ecosystem**, improving operational efficiency and reducing manual processes.
- **Design, build, and support** interactive dashboards and reporting applications used by business and technology stakeholders.
- **Develop data-processing pipelines** using Python and internal Quartz libraries to analyse and transform large datasets.
- **Automate reporting, monitoring, and alerting workflows**, reducing manual effort and improving data accuracy.
- **Build and enhance web-based applications and dashboards** for operational and business intelligence reporting.
- **Create scheduled jobs and workflow automation** using Quartz Scheduler and internal tooling.
- **Develop data exports, email notifications, and reporting solutions** to support business operations.
- **Perform code reviews, testing, troubleshooting, and production support** for critical applications.
- **Contribute to continuous** improvement initiatives by identifying opportunities for automation and process optimisation.

01/2021 – 05/2024
London, United Kingdom

Front End Developer Maddison Digital

- Spearheaded the development of a **responsive web application using HTML, CSS, and JavaScript**, resulting in a **notable 20% increase in user engagement** and a **remarkable 15% decrease in bounce rate**.
- Collaborated with a cross-functional team to successfully implement the **Agile methodology**, resulting in a stellar **30% improvement in project delivery time** and a significant increase in overall team productivity.
- Led meticulous **code reviews and executed extensive refactoring** to **reduce page load time by an impressive 40%** and significantly **enhance overall site performance**.
- Collaborated with cross-functional teams to translate **wireframes and design concepts into visually appealing and functional web interfaces**, adhering to best practices and accessibility standards.
- Collaborated with **cross-functional teams** to design and develop **scalable APIs and backend systems**, utilizing technologies such as **Django, Flask and MongoDB**, resulting in streamlined data retrieval and enhanced application performance.
- Conducted **thorough code reviews, identified and resolved bugs and performance issues, and implemented best practices**, resulting in a **20% reduction in application crashes and improved overall system stability**.
- Led the implementation of **modern front-end frameworks** such as **React.js**,

Work Experience

- **optimizing page load times** and **enhancing the overall user interface**
 - Collaborated with cross-functional teams to design, implement, and **deploy innovative features and enhancements**, contributing to the overall **improvement of the product**.

Certificates

07/2022

Full Stack Software Development (E-commerce Applications)

Code Institute

55640491

The Diploma in Full Stack Software Development (E-commerce Applications) has been credit-rated by the University of the West of Scotland at level 8 on the Scottish Credit & Qualifications Framework with 60 SCQF credit points.
